PROFESSIONAL SUMMARY

Full-Stack Senior Software Developer on the Public Websites team at Opus Inspections with 5+ years of experience. Thrives in fast-paced, sprint-driven environments where meeting deadlines is essential, and brings strong organizational skills that result in highly reusable, maintainable solutions. Versatile across databases, user interfaces, and third-party integrations, building software that balances technical precision with real-world impact.

EXPERIENCE

Senior Software Developer | Opus Inspections

2026 - Present

- Served as Technical Advocate and interim Scrum Master, providing technical leadership and unblocking the team.
- Automated creation of a new state public site into a single command, integrated as a Visual Studio solution template, provisioning a five-service containerized stack (ASP.NET Core API, Wagtail CMS, Vue frontend, Redis, PostgreSQL) with credential setup across NuGet, npm, pip and AWS S3, reducing per-site setup from ~1 hour to under 5 minutes.
- Configured AWS Elastic Beanstalk and ECR to deploy containerized web applications across multi-stage environments (DEV, UAT, PROD).
- Leveraged AI-assisted engineering tools to enhance code review depth, accelerate design exploration, and improve implementation efficiency while preserving engineering judgement.
- Brought state public sites into Section 508 accessibility compliance, meeting federal requirements for government web applications.
- Established pull request merge requirements within CI/CD, strengthening engineering standards and improving release reliability.
- Collaborated closely with cross-functional teams to plan features that effectively met evolving business needs without compromising code quality.

Software Developer | Opus Inspections

2023 - 2026

- Developed and maintained four public-facing full-stack web applications, delivering essential online services for multiple state programs.

DEVOPS

AZURE DEVOPS (CI/CD)

DOCKER/DOCKER COMPOSE

AWS

❖ S3

❖ EC2

❖ CLOUDFRONT

❖ ECS

JENKINS

- Architected and implemented an AWS CloudFront and S3 media delivery system with secure URL signing, migrating 1GB+ of data to cloud storage.
- Redesigned CSS architecture using ITCSS methodology, reducing CSS by 95% and improving long-term maintainability without altering the user-facing experience.
- Defined and documented deployment cycles and trained new team members, accelerating onboarding and ensured smooth release processes.
- Leveraged content management systems and feature-flag-driven development to balance code reusability with unique customer requirements.

Software Developer I | Capital Insurance Group

2021 - 2022

- Designed, developed, maintained, and tested two full-stack web and desktop applications, delivering consistent and dependable functionality for underwriters.
- Participated in deployment captain cycles supporting production deployments and release readiness activities.

Technology Associate | Capital Insurance Group

2020 - 2021

- Practiced test-driven development with comprehensive automated tests that reduced bugs and manual testing time.
- Developed SQL scripts and updated packages to identify and resolve bugs.
- Featured as Intern of the Month on company newsletter and on its website.

EDUCATION

Eastern Washington University | BS Computer Science

2017 - 2021

- Completed degree Cum Laude and awarded 2021 BSCS Outstanding Student.
- Placed 2nd in EWU Programming Competition.

Eastern Washington University | BA Music

2017 - 2021

- Completed Bachelors of Arts in music with emphasis in piano.
